

Quality Management System Policy

MOII governs its Management System policy through the continuous improvement of methods, processes and products, using the correct planning and full use of its resources, in close collaboration with its customers, employees, suppliers and other stakeholders.

To this purpose, Moldoeste II adopts the following principles:

- To guarantee the needs of stakeholders, ensuring their satisfaction and loyalty;
- To establish a dynamic of learning, development and innovation among employees, providing adequate means and training for the good performance of their functions;
- To provide products and services, with the precision and rigor capable of satisfying the customer's requirements;
- Commitment to deadlines and product quality assurance;
- Ensure risk assessment with the definition of preventive controls to reduce its impact on the product, processes, customer, and other stakeholders;
- Compliance with the requirements of IATF 16949;
- Compliance with customer requirements, legislation, regulations, compliance obligations;
- Commitment to identify and assess the main hazards to which workers are exposed in order to define risk mitigation actions, as well as the provision of appropriate safety equipment for their work stations;
- Commitment to the rational use of resources based on the concept of sustainable development in order to improve environmental performance;
- Ensuring correct waste management and commitment to environmental protection including pollution prevention.

The Management System Policy was approved on 03/15/19.

Moldoeste II Management System Policy is available to all stakeholders.
